BetaSP or DV or 1"	\$150	\$120
3/4" or VHS	\$100	\$70

DIGITAL MEDIA DELIVERY

Telestream Clip Mail Pro

Telestream Clip Mail Pro uses the convenience of the Internet to transport video and audio files at resolutions varying from approval to master quality. Clip Mail encodes from any video or audio source to MPEG and transmits the file over our broadband Internet connection to another Clip Mail site (found in most major cities around the world) or an FTP server. The forwarded media is stored until ready for high quality viewing or off-loading to tape or disk. Matchframe can dramatically reduce internet transmission times by adding the acceleration of our *Digital Fountain Transporter* to the transmission. Transmission via Digital Fountain requires a broadband connection at the receiving site.

Telestream MPEG Compression	\$50 per hour plus VTR
Telestream Transmission	Please call for quotation
Digital Fountain Transmission	Please call for quotation

Matchframe FTP Site

Matchframe operates a password protected FTP site available to download or send digital media files from/to any remote site equipped with a broadband connection.

FTP Post or Download	\$50
MPEG Compression	\$50 per hour plus VTR
