NON-LINEAR EDITING / RENTALS

Matchframe's non-linear editing systems are custom configured to meet the specific needs of each project. Systems (NTSC or PAL) can be delivered to your location or used in one of the comfortable cutting rooms at our main Burbank facility. In all cases you'll appreciate Matchframe's superior system design and 24/7 technical support.

Avid Off-line Editing

The AVID Media Composer and Software Composer set the industry standard for non-linear off-line editing.

Working with a "Flex" or comparable telecine database file will provide negative cut and audio source lists to support a film finish.

Technical Support

Matchframe also offers technical support for client-owned Avid and Final Cut Pro systems. Please call for a quote.

Avid Edit Bays at Matchframe

There is a one-hour minimum for each edit session and a half-hour minimum charge for additional equipment. Billing is in quarter hour increments thereafter.
